

Wiring regulations

Brother tapes are designed to help you comply with wiring regulations, so whatever electrical installation you're labelling, you'll be in line with the identification requirements below. Plus, thanks to our Mobile Cable Label Tool app, you can also design and print your labels wirelessly from smartphones or tablets.

514.12

Identification of wiring for inspection, testing, repairs or alteration.

514.3

Identification of conductors by colours, letters or numbers where necessary (Ref: IEC 60445).

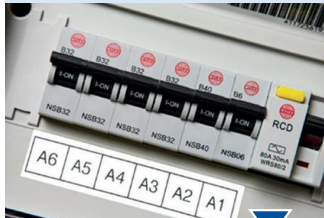

TZe-FX231

For cable marking

12mm black on white
Flexible ID tape (8m)

514.4

Clear identification of protective devices.

TZe-241

For consumer units

18mm black on white
laminated tape (8m)

514.1

Identification of purpose of switchgear and controlgear, and warning notices where appropriate.

TZe-251

TZe-651

For general notices

24mm black on white
laminated tape (8m)

For warning labels

24mm black on yellow
laminated tape (8m)
